

CLEAREDGE

FRAMELESS RETRACTABLE GLASS

HANDLE OPTIONS

Clear Edge Frameless Retractable System

Handle and Lock Option

1. STAINLESS STEEL CABLE ONLY [STANDARD]

- Stainless Steel cable on Access Panel
- When pulled it retracts a top and bottom pin
- This still allows the system to be opened from the inside only.
- Required when the client wants a clean look with no interruption to the view
- Inside access only
- Operation: Pull cable to open and close

2. TURN KNOB HANDLE WITH CABLE [CUSTOMER UPGRADE]

- A stainless steel thumb turn handle with the stainless steel cable on Access Panel
- Works the same mechanisms as the s/s cable
- This still allows the system to be opened from the inside and/or the outside.
- Needs a Sill Lock to be lockable
- Required when the system is over 2300 high or in high wind load area
- Inside access only or Inside and outside access
- Operation: Turn the knob to open and close
- Colour Options: Black, Clear Anodized or powder coated to customer specifications

3. ITALIAN PATCH LOCK HANDLE [CUSTOMER UPGRADE]

- A patch lock handle with a push knob on Access Panel and 1st sliding panel
- Works as a standard patch handle
- This allows the system to be opened from the inside and the outside.
- Required when the customer wants a lockable handle. Not to be used in systems higher than 2300 or high wind load areas without an additional Sill Lock
- Inside and outside access
- Operation: push the inside button and pull/ or push the handle simultaneously
- Colour Options: Black, Grey or Chrome

Lock Option

1. SILL LOCK

- A Mortise Lock in the bottom sill
- When turned it slots a catch into the bottom track
- This still allows the system to locked
- Required when the client wants a to lock system with a S/s Cable only or Turn Knob Handle
- Required in high wind load areas and with the Italian Patch lock Handle is higher than 2300mm
- Inside access only or Inside and outside access
- Operation: Turn knob or key lock
